

Project: Basement finish in "Liberty on the Lake."

Project Description: Basement remodel of a newly-built home located in the prestigious Liberty on the Lake development in Stillwater, MN. The basement was completely unfinished, inviting Cates Fine Homes to transform the concrete block into a continuous design of their finished home.

Proudest Moment: Unbelievably, Cates Fine Homes completed the entire basement remodel with minimal disruption to the client, who continued to work from home. The client reported that all workers were extremely polite and courteous, making this potentially stressful situation a harmonious success. The magic continued for Cates Fine Homes as they additionally relocated the laundry facilities from the main floor to the second floor, completing another seemingly effortless project.
